

Library & Information

The EIU Library serves the information needs of the Institute and the general public. The principal function of the library is to develop and deliver timely, accurate and cost-effective information in order to support the research activities within the Institute. The collection includes information and data on the economics of various energy resources, the environmental effects of energy consumption, energy efficiency, renewables and technologies. Special Collections include Statistics Uganda Publications, IEA publications and regulatory publications and documents. Institute members are welcome to contact Mary Suzan Aturo at suzan@energyinstug.org for assistance in obtaining energy and environment related information.
